Transforming LIVES.
ENRICHING Future

#beMSUrians

Mission

TRANSFORMATIVE - To provide compelling transformative learning experiences through educational opportunities and a collaborative learning environment centred on pioneering innovative delivery, ethical values, and economic as well as social transformation efforts.

GLOBAL - To be a leading globally connected university, diversely rich in culture and inclusiveness, and providing pathways for the exchange of knowledge and mobility programmes.

ENTREPRENEURIAL - To be the catalyst in a sustainable entrepreneurship ecosystem that promotes the development of an entrepreneurial culture as well as leaders with a global mindset.

RESEARCH & INNOVATION DRIVEN - To promote the culture of research and innovation in responding to national and global challenges; commercialising its interdisciplinary and translational research outcomes through entrepreneurship and incubators.

INDUSTRY EMBEDDED - To enhance a collaborative environment with industries, where applications of knowledge and research are incorporated into an industry-embedded curriculum that complements talent mobility activities, career pathways, and global community engagement efforts.

CARING INSTITUTION - To ensure the talented but disadvantaged are not impeded from achieving their dreams on account of unfavourable socio-economic station, and to accord appropriate opportunities for the gifted to actualise their true potential.

HOLISTIC EDUCATION - To mould holistic graduates through a balanced education that will enrich their personal, interpersonal and social skills through multi-disciplinary approaches, leadership, integrity, professionalism, and academic excellence, and nurture lifelong learning.

BETTER FUTURE - To generate excellent talents, lifelong learners, and responsible global citizens, and create diversified career pathways that help transform lives for a better future.

Vision

MSU aspires to be a leading transformative global university, engaging the society through entrepreneurship, research, innovation, industry embedment, and holistic education for a better future.

Shah Alam

'A vibrant and friendly city for all '

Management and Science University is located right in the heart of Shah Alam, the capital city of the state of Selangor. It is a city tailored for all, with much to see and do; from shopping malls and cafes, cultural attractions to parks and recreational centres. This 'Orchid City' offers visitors a variety of dining options from popular coffee outlets, bistros to fine dining restaurants; perfect for all budgets.

With a comprehensive public transportation system, visitors are able to have a smooth

commute to Kuala Lumpur, Malaysia's capital city and reach the Kuala Lumpur International Airport via the Express Rail Link (ERL) in just thirty minutes. Further expansions set to be completed in 2020 will see the LRT3 (Light Rail Transit) system which runs through strategic locations in Shah Alam; bringing better mobility and connectivity to commuters. An added bonus will be the Malawati LRT3 station which will be right next to MSU; providing easy access to all.

Regardless of where you come from, whether halfway across the world or a few kilometres away, Shah Alam is an ideal destination to continue your studies.

Bachelor in Food Service Technology (Hons)

KPT/ JPS (R2/811/6/0035) 06/22

ABOUT THE PROGRAMME

MSU's Bachelor in Food Service Technology programme prepares you for successful operation of the food business. With food service technology, businesses can find ways not only to make their operation run more smoothly, but also make an impact on its customers through better quality food. Through this programme, you will be exposed to monitoring techniques and effective approaches to running a food service business. You will learn food microbiology, processing and preservation, nutrition, also quality control and assurance.

Experience studying abroad through MSU Global Mobility Programme, through which you can study for a semester or more at MSU's international partner universities in Europe or Asia. You also have the option of completing your internship overseas through the MSU Global Internship Programme. Both these mobility programmes will further enhance your future employability.

AMONG THE COURSES OFFERED

Year One

- Microbiology
- Food Microbiology
- Food Service Information System

Year Two

- Purchasing and Menu Planning
- Food Quality Control and Assurance
- Food Service Layout and Design
- Food Processing and Preservation

Year Three

- Food Service Management
- Ethics in Food Industry
- Industrial Training

DURATION
3 YEARS

FURTHER STUDY OPTIONS

Bachelor in Food Service Technology (Hons) provides a pathway to postgraduate programmes including the Master in Science (Food Technology) and the Master of Science (Applied Science) offered by MSU's School of Graduate Studies.

CAREER PROSPECTS

- Food Manufacturing Officer
- Food Technologist
- Quality Control Officer
- Product Development Manager

Bachelor in Nutrition (Hons)

KPT/ JPS (R/726/6/0065) 08/26

ABOUT THE PROGRAMME

Awareness of healthy living, exercising and balanced diet has risen exponentially across the years. People are much more aware of good nutrition and generally would search for healthier food options. This is where nutritionists come into the picture. Nutritionists help translate nutrition science to the public and provide advice about good food choices for healthy eating.

The curriculum of the MSU Bachelor in Nutrition programme aims to produce graduates competent in handling not only common nutritional problems but also capable of decision-making in clinical and community nutrition. The innovative and constructive learning environment at Management and Science University will assist you in graduating with a host of skills including a wide range of transferable communication, analytical and interpersonal skills. The industrial component of the programme may be conducted locally or abroad through the MSU Global Internship programme, which will further amplify your future employability.

AMONG THE COURSES OFFERED

Year One

- Human Anatomy and Physiology
- Principle of Human Nutrition
- Nutrition Through Life Cycle

Year Two

- Food and Nutrient Analysis
- Nutrition and Metabolism
- Assessment of Nutritional Status
- Nutrigenomics

Year Three

- Contemporary Issues in Nutrition
- Health Promotion and Education for Nutrition
- Nutrition Therapy

Year Four

- Internship

CAREER PROSPECTS

- Nutrition Officer
- Public Health Educator
- Wellness Counselor

Bachelor in Nursing (Hons)

KPT /JPS (R2/723/4/0046) 01/23

ABOUT THE PROGRAMME

Nursing is a specialised profession that focuses on caring, nurturing, educating and research within the healthcare system. Those who are willing to learn, who possess leadership qualities and have a strong desire to care for and improve the quality of life of the sick, should consider pursuing a course of study in nursing. The nursing degree at Management and Science University aims to produce knowledgeable and skilled nurses who are caring and emphatic towards those under their care. Attachment with partner hospitals and community health clinics towards your programme completion ensures your industry readiness for a career in nursing.

AMONG THE COURSES OFFERED

Year One

- Pharmacology
- Communication and Counselling in Nursing
- Nursing Care I: Infections, Fluid and Electrolyte
- Clinical Practice I and II

Year Two

- Microbiology and Parasitology
- Obstetric and Gynaecology Nursing
- Pediatric Nursing
- Clinical Practice III and IV

- Registered Nurse

Bachelor in Cardiovascular Technology (Hons)

KPT/JPS (N/725/6/0079) 12/22

ABOUT THE PROGRAMME

Cardiovascular technologists deal with the diagnosis and treatment of patients with diseases of the heart (cardiac) or blood vessels (vascular). They perform cardiovascular examination and therapeutic procedures through the use of specific high-technology equipment and at the direction of qualified physicians, to create an easily definable data from which correct anatomic and physiologic diagnosis may be developed for each patient. Cardiovascular technologists play an integral role in the treatment process, applying their judgement, analytical thinking and problem solving skills in the process of obtaining accurate diagnostic information.

The undergraduate programme leading up to the award of a Bachelor in Cardiovascular Technology (Hons) from Management and Science University (MSU) has been designed according to the recommendations of the community of cardiovascular technologists via the Malaysian Society of Cardiovascular Technology. With a curriculum designed for current clinical needs, qualified and experienced lecturers from both clinical and academic research backgrounds, knowledge transfer through projects and research based activities, students are well prepared for a career in healthcare.

AMONG THE COURSES OFFERED

Year One

- Medical Microbiology
- Nursing Science
- Anatomy and Physiology
- Biochemistry

Year Two

- Electrocardiography
- Echocardiography
- Invasive Cardiovascular Lab
- Adult Cardiology

Year Three

- Clinical Pharmacology
- Paediatric Cardiology
- Medical Informatics
- Pacemaker and Electrophysiology

Year Four

- Clinical Exposure
- Research Project

Diploma in Nursing

KPT /JPS (R2/723/4/0046) 01/23

ABOUT THE PROGRAMME

The core of MSU's Diploma in Nursing programme is the integration of practice and care aspect of nursing. As a student of nursing, you will be involved in comprehensive learning experience involving classroom work, activities in simulation wards, practical room and skills lab. You will be trained by lecturers with extensive training in nursing, who share their expertise whilst keeping you abreast with the latest developments in the health care field.

Nursing is a challenging profession, requiring students to have mental and emotional strength. The innovative and constructive learning environment at Management and Science University provides support to students to excel in all aspects of their studies. Attachments with partner hospitals and community health clinics at the end of the programme ensure you graduate industry-ready for a career in nursing.

AMONG THE COURSES OFFERED

Year One

- Psychology and Sociology in Nursing
- Nursing Care: Infections, Fluids, Burns and Scalds
- Basic Pharmacology
- Communication for Nurses

Year Two

- Nursing Care: Musculoskeletal, Genitourinary and Endocrine System
- Paediatric Nursing
- Community Health Nursing

Year Three

- Mental Health and Psychiatric Nursing
- Medico Legal Aspects in Nursing
- Emergency and Disaster Nursing
- Clinical Practice

- General Practice Nurse

Diploma in Medical Assistant

KPT/JPS(R2/720/4/0120) 07/23

ABOUT THE PROGRAMME

Assistant Medical Officers (AMOs), better known as Medical Assistants, are vital to the daily operations of many medical practices. Their roles in hospitals and community based clinics are integral to the healthcare system as they work closely with the Medical Officers, performing a multitude of tasks from administrative to clinical.

The curriculum for the Diploma in Medical Assistant programme at Management and Science University is designed to provide students with a comprehensive foundation in elementary medical sciences. You will receive extensive learning in the classroom, simulation ward and skills lab, and attain valuable real-life experience through attachments at partner hospitals and community health clinics. This programme is fully accredited by the Malaysian Qualification Agency (MQA) and recognised by the Medical Assistant Board (MAB) in Malaysia.

AMONG THE COURSES OFFERED

Year One

- Advanced Anatomy and Physiology
- Medical Microbiology
- Basic Surgery

Year Two

- Clinical: Department of Ophthalmology
- Emergency Treatment
- Advanced Surgery
- Nursing Science

Year Three

- Paediatric
- Clinical: Community Health Unit

CAREER PROSPECTS

- Medical Assistant

Diploma in Radiotherapy

KPT/JPS(N/725/4/0036) 04/21

ABOUT THE PROGRAMME

Radiation therapists, therapeutic radiographers, or radiotherapists work especially closely with radiation oncologists and medical physicists. They effectively design and administer radiation treatments and manage the wellbeing of primarily cancer patients. Their responsibility is to interpret the radiation oncologist's prescription and develop a treatment plan.

MSU's Diploma in Radiotherapy programme will train you across the medical sciences spectrum; from human anatomy and oncology to radiation therapy and imaging, among others. You will receive training from our lecturers who have years of experience in the field, and will be engaged in collaborative group projects, discussions and presentations in the course of your study. A clinical practice will further enhance your theoretical and practical skills in this discipline.

AMONG THE COURSES OFFERED

Year One

- Pharmacology
- Patient Care in Radiotherapy
- Radiotherapy Equipment
- Radiation Physics

Year Two

- Image Processing
- Radiographic Anatomy
- Basic Oncology

Year Three

- Sectional Anatomy
- Introduction to Special Imaging Modalities
- Clinical Practice

DURATION

CAREER PROSPECTS

- Therapeutic Radiographer
- Diagnostic Radiographer

Diploma in Physiotherapy

KPT /JPS (N/726/4/0283) 04/21

ABOUT THE PROGRAMME

Physiotherapy or physical therapy is the treatment of disease or injury by physical means such as exercise therapy, mobilization, or movement. A physiotherapist's work involves the rehabilitation of patients across ages and conditions such as orthopedic, sports injury, chronic or neurological diseases. MSU's Diploma in Physiotherapy programme will equip you with core knowledge in areas such as human anatomy and physiology, kinesiology and pathology.

The curriculum is carefully crafted to ensure students become competent and inventive practitioners later in their career. This programme is delivered through innovative, 21st century teaching techniques, which will engage you in collaborative, highly focused assessments and projects to give you a solid foundation for a career in physiotherapy.

AMONG THE COURSES OFFERED

Year One

- Human Anatomy
- Physiotherapeutic Skills
- General Pathology
- Clinical Placement I

Year Two

- Physiotherapy in Respiratory
- Physiotherapy in Acute Care
- Physiotherapy in Special Clients – Pediatrics
- Clinical Placement II

Year Three

- Physiotherapy in Special Clients – Geriatric
- Physiotherapy in Special Clients – Women's Health
- Clinical Placement III, IV, V and VI

DURATION
3 YEARS

Bachelor in Environmental Health (Hons) focuses on the surrounding environment and factors that affect the inhabitants in terms of toxicology effects of the environment, as well as to focus on the needs of management of daily waste production, the monitoring of water and air quality, and risk assessment to the public. Related laws and regulations will be emphasized to enhance sustainability of the living environment.

AMONG THE COURSES OFFERED

Year One

- Introduction to Environmental Health and Safety
- Anatomy and Physiology
- Biochemistry
- Environmental Health Analytical Instrumentation

Year Three

- Pollution Control and Technology
- Environmental Health Impact Assessment
- Disease Mapping and Modelling
- Environmental Health Project I
- Environmental Health Field Practical Experience I

Year Two

- Water Supply and Quality Control
- Vector and Pest Management
- Domestic and Industrial Wastewater Management
- Management of Hazardous Materials

Year Four

- Environmental Health Project II
- Environmental Health Field Practical Experience II

DURATION
3 YEARS

- Insurance Underwriter
- Phlebotomist

Diploma in Occupational Safety and Health

KPT/JPS (R2/862/4/0053) 08/24

ABOUT THE PROGRAMME

Occupational safety and health is a multidisciplinary field concerned with the safety, health and welfare of people at work. The concern for occupational safety is not only for industries which are high-risk such as construction sites, ship yards and container terminals but also for non-industrial worksites. Apart from focusing on areas of health and safety, the curriculum integrates business management into the mix of specialized technical health and safety skills to balance scientific with real-world management. You will spend your final year in internship, to gain skills and exposure that enhance your learning experiences.

The Diploma in Occupational Safety & Health programme at Management and Science University aims to produce graduates capable of maintaining a safe and healthy environment in the 21st-century workplace. You will be equipped to pursue your studies at a higher level or enter the job market.

Diploma in Sport Science

KPT /JPS (R/813/4/0029) 12/25

ABOUT THE PROGRAMME

The Diploma in Sport Science programme offers the opportunity for you to pursue your interests in athletics. You will develop in-depth knowledge of the key factors in sports, exercise and health through the science perspective. As a student of sport science, you would be looking into how exercise programmes and activities affect our health, and also physical activity as treatment and prevention of diseases.

As the market for the sports industry grows, graduates of this programme will meet the country's demand for experts trained in both science and sports at the administrative and sub-professional levels. This programme will be your first step towards a career in coaching, teaching, health and fitness, exercise science, leisure and sport administration.

AMONG THE COURSES OFFERED

Year One

- Anatomy and Physiology
- Health and Fitness Assessment
- Exercise Physiology
- Principles of Coaching

Year Two

- Motor Learning and Development
- Sports Psychology and Sociology
- Designing Exercise Program
- Management and Maintenance of Sports Facilities

Year Three

- Legal and Ethical Issues in Sports
- Sports Attachment

Bachelor of Optometry (Hons)

KPT/ JPS (R2/726/6/0088) 07/23

ABOUT THE PROGRAMME

Optometry is a specialised branch in healthcare which trains you to detect, diagnose and manage ocular diseases. As a student of optometry, you will learn how to examine, diagnose, treat, and manage diseases and disorders of the visual system and its associated structures.

Throughout the programme, you will be immersed in laboratory and clinical sessions together with collaborative, highly focused assessments and projects. This will enhance your analytical, teamwork and interpersonal skills.

Opt to study abroad for a semester or more through MSU Global Mobility Programme to experience various learning environments at MSU's international partner universities. Industrial training towards the end of the programme ensures working exposure to help you relate to your future career. The MSU Bachelor in Optometry programme is approved by the Malaysia Optical Council (MOC). You need to be registered with MOC to be a certified practitioner in Malaysia.

AMONG THE COURSES OFFERED

Year One

- Introduction to Optics
- General Pathology and Disease Process
- Physical and Geometrical Optics
- Eye Anatomy and Physiology

Year Two

- Ophthalmic Optics
- Visual Optics
- Clinical Interview and Health History Taking
- General Pharmacology

Year Three

- Ocular Pharmacology
- Investigative Techniques in Ophthalmic Diagnosis
- Low Vision and Geriatric Optometry

Year Four

- Public Health and Community Optometry
- Clinical Problem Solving in Optometry
- Industrial Training

DURATION
4 YEARS

FURTHER STUDY OPTIONS

Bachelor of Optometry (Hons) provides a pathway to postgraduate programmes including the Master of Science (Applied Science) offered by MSU's School of Graduate Studies.

CAREER PROSPECTS

- Optometrist
- Vision Therapist
- Ophthalmic Product Specialist

Diploma of Ophthalmic Dispensing

KPT/ JPS (N/340/4/0711) 03/22

ABOUT THE PROGRAMME

The profession of ophthalmic dispensing entails matching optical prescriptions with the most appropriate spectacle frames and lenses, taking into account the patient's line of work and lifestyle besides visual and cosmetic needs. Dispensing opticians will also provide instructions to patients in the care and cleaning techniques for lenses.

The curriculum for the Diploma in Ophthalmic Dispensing programme at Management and Science University (MSU) is designed to provide students with a comprehensive foundation in this discipline. Students will receive extensive learning in the classroom and the skills lab, and attain valuable real-life experience through industrial attachment at optical shops.

AMONG THE COURSES OFFERED

Year One

- Ophthalmic Lens
- Ophthalmic Instrumentation
- Dispensing
- Optics

Year Two

- Physiological Optics
- Introduction to Ocular Disease
- Law and Professional Aspect for Dispensing Optician
- Ocular Physiology

Year Three

- Vocational and Specialty Ophthalmic Dispensing
- Eyeglass and Contact Lens Dispensing Practice
- Industrial Training

Studying at msu

IMPROVING YOU

The learning experience at Management & Science University is not only about getting the theoretical knowledge of your chosen field. We are also committed to providing you with the skills required to excel in the workplace or for further studies. Skills such as communication, leadership and teamwork are some of the soft skills embedded in our course delivery.

“As our continuous improvement system, we will actively seek your feedback and views on your programme and campus facilities so we can continue to develop and upgrade them.”

Through our mentoring system, the lecturers are able to monitor your academic and personal progress so you are able to develop further. By the end of your studies, we expect you to be able to perform tasks independently, be resourceful, and have the entrepreneurial acumen with the right moral values. These are what employers will expect of a graduate you.

Industrial Experience

ADVANTAGES OF INDUSTRIAL EXPERIENCE

Through the industrial experience, you are able to display the skill of applying your academic knowledge into the working world.

Networking skills will be an added bonus for you as you are able to start on building your contacts earlier in your working life.

Global Mobility Programme

@ Royal Brisbane and Women's Hospital, Australia

management and science university

@ Kadir Has University, Istanbul, Turkey

@ASEAN Young Women Leadership Programme, Japan

'Imagine spending a portion of your studies in another country. The global mobility initiatives in MSU give you the option of spending a semester or more overseas depending on the programme you choose.'

The **Global Mobility Programme (GMP)** provides a platform for students to experience new countries and different cultures. You are able to study for one or more semesters at an international partner university.

Through the **Global Internship Programme (GIP)**, MSU students are able to experience real life working stint in an international setting. Students are able to immerse themselves in other cultures and at the same time gain an insight to their chosen fields.

MSU **Global Leadership Programme (GLP)** is focused on preparing students to become the leaders of tomorrow in their chosen profession and to further develop a global mind-set. It is structured to provide opportunities to students to enhance their learning experiences and develop important soft skills such as leadership, teamwork and communications skills.

SUPPORT
to Meet Your Needs

1

Student Career Development

The Student Career Development department complements the faculties, schools and centres of learning of the university in areas of students' personal and professional developments. Its role is seen as an enhancer of students' character building through the activities that it organizes. Career based activities which are aimed at sharpening students' organizational skills and personal competencies are a common feature throughout any academic year.

Opportunities for entrepreneurial ventures are assimilated in various activities to provide the foundation and experience for students to embark into the world of business. Students are also given guidance in the areas of employment development whereby the department offers individualized assistance for students with all of their career-related needs.

Student Career Department also serves as a hub for campus life as a variety of students based events are jointly organized between the department and the various clubs and association under its care. The department also provides counseling and assistance on general welfare of students, housing and alumni networking.

⌚ Support to Meet Your Needs ⌚ Accommodation

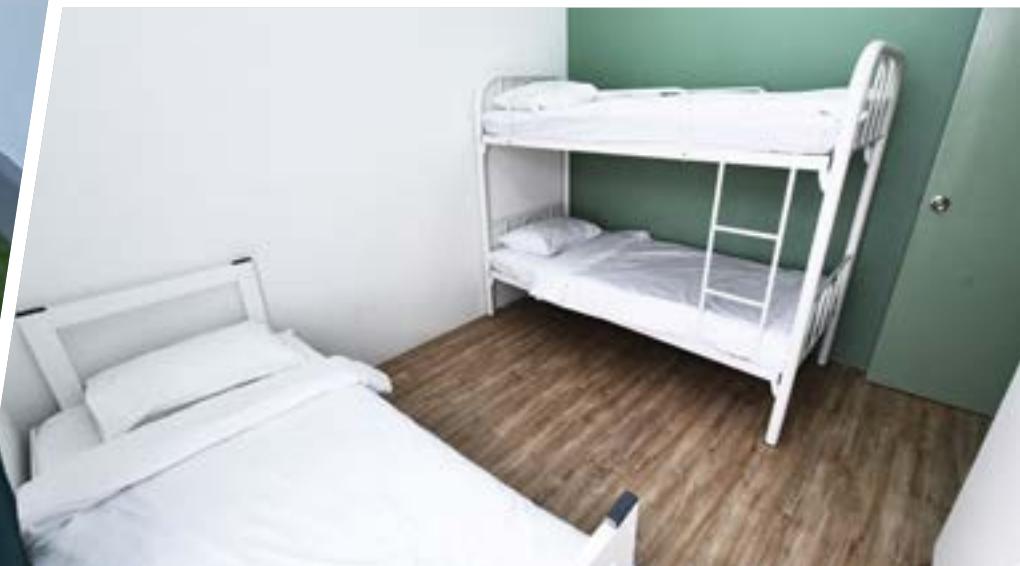

For more information, please visit www.msu.edu.my ⓘ

2

Accommodation

One of the biggest concerns of any university student is finding the right accommodation. Since it is an integral part of your student life, here at MSU we are dedicated to helping you find the accommodation that fits your needs and provides you with a supportive learning environment right on the University's grounds. Through the Residence, MSU's very own on-campus student housing with 260 apartments and studio-styled accommodation, students have easy access to all the University's amenities. Your future residence comes with the basic necessities.

3

Library and Resource Centre

The resource centre services are geared to meet the needs of all students and staff. Extensive collections of learning and reference materials are available, including monographs, books, magazines, journals, theses, students' projects, mainstream English and Malay newspapers and past year exam questions.

In line with the connected world that we live in, MSU library provides on-line access to thousands of journals and electronic books. Users can access, download or print the journal articles or books via the MSU Student Portal. Through our online facility, users will be able to retrieve more than 130,000 e-books and thousands of journal articles in various disciplines or subjects. For those who prefer to peruse through traditional books, the MSU library currently holds more than 30,000 books.

MSU library is fully automated and our computerized Library Management Utility, will provide users with information about what is held in the collections and what has been borrowed, and also allow self-reservations and renewal of borrowings. Users can also do their own searching and status checking via the OPAC (Online Public Access Catalog).

“the MSU library currently holds more than 30,000 books”

4

Financial Assistance and MSU Scholarship

As part of promoting the culture of giving and being grateful, MSU allocates RM3 million yearly as financial assistance to deserving students. The funds are dispensed through various means including collaborative efforts between MSU and several public and private institutional partners. All scholarship and financial assistances are provided through the MSU Foundation and the following schemes:

PRESIDENT SCHOLARSHIP

MSU's very own scholarship is one such scheme that has over the years benefited many students. This is an award given to students who exhibit exemplary academic achievements and come from an economically challenged background.

JOINT SCHOLARSHIPS

Joint scholarship schemes such as SKOR Berita Harian and The Star Education Fund are some examples of MSU's involvement in ensuring the less fortunate gets to continue their tertiary education at MSU. The scholarship is opened to all Malaysians and the financial assistance awarded ranges from a full to a partial

scholarship. Details of the scholarship and application forms are available at the Registrar's office.

FELLOWSHIP & SLAB SCHEMES

In its effort to train qualified academics to manage the university's human capital needs and to further enhance its research and innovation activities, MSU offers fellowship awards to local and foreign candidates for graduate studies leading to Phd at MSU. The SLAB scheme, a fully funded internal programme aimed at developing academic staff in their pursuit of higher education, is another effort of the university among its staff-development initiatives.

5

MSU Foundation

'Yayasan MSU' or the MSU Foundation is a foundation for building excellence. The foundation is an embodiment of the aspirations of the Founder and President of MSU, Professor Tan Sri Dato' Wira Dr Mohd Shukri, who is passionate about helping those in need and driven towards excellence as well as scholarly success. The foundation itself is an extension of the university's commitment to education, lifelong learning and community engagement work, a reflection of MSU being a caring and giving institution. It is committed towards providing financial assistance and scholarships for research or academic pursuits to eligible recipients with the hope that the contribution will spark opportunities for social and economic improvements in the beneficiaries and the society at large.

Underlying this benevolent effort is the commitment to instill the values of excellence in the creation of quality human capital. This noble and charitable cause rests on the belief that the spirit of giving will eventually spur compassion, understanding and tolerance, essential ingredients in the creation of an integrated society.

Community engagement is also an area in which the Foundation aims these are the uplifting of living standards in the urban poor and the provision of financial assistance to orphans. Various community engagement activities are targeted towards these groups annually. The Foundation's involvement also encompasses the poor in Indonesia, Thailand, Cambodia, Vietnam, Sri Lanka and India.

6

International Office

Welcoming international students from 37 countries is part and parcel of MSU's vision to become a global university of choice. The cultural diversity on campus brings exciting opportunities for all students to develop their globally mindedness, and social responsibility, and bolster their value to future employers.

SUPPORTING INTERNATIONAL STUDENTS

The International Office is committed to provide necessary assistance to all international students to make them feel at home from their moment of arrival.

If you are an international student, you can expect assistance by way of:

- a dedicated orientation programme upon your arrival,
- on-campus housing,
- professional consultations in matters such as immigration and visas, and
- friendly support from our International Student Society.

“on campus housing and friendly support from our International Student Society”

Applying to msu

We welcome you to join our vibrant MSU community. Come visit us during our open days and get a feel for the programme of your choice before you apply.

During the visit, there will be numerous activities lined up for you. Take a tour of the campus and faculties to look at the teaching and learning facilities. Meet with our friendly counsellors to get detailed information on the programmes at MSU. Talk to your future lecturers at their faculty demonstrations and to our students for an idea of your future university life here.
